PETER LEE

Agentic AI Designer ▪ Director, Product Design ▪ Design Leadership

917-344-9594 · peterlee01@gmail.com · LinkedIn · Portfolio · Bronxville, NY

SUMMARY

Strategic Product Designer with a track record of driving measurable business outcomes at the intersection of agentic AI, user experience, and product strategy. Specialized in designing autonomous agent workflows and AI-powered experiences that build user trust, accelerate adoption, and grow revenue. Expert at leading high-performing design teams, building scalable design systems, and translating deep UX research into product decisions that strengthen market positioning and customer lifetime value. Equally comfortable at the whiteboard and in Figma, a hands-on leader who shapes vision and ships work.

EXPERIENCE

Lead Product Design Consultant Jan 2026 – Present

Credentialai | Remote

- Architected and shipped a live multi-agent coordinator (Claude API + Tool Runner) orchestrating three autonomous sub-agents against real government data (NPPES, HHS-OIG) for identity, sanctions, and license verification — a working production system
- Designed confidence-tiered, cited verdict UX (GO / NEEDS REVIEW / NO-GO) and human-in-the-loop review workflows that make high-stakes credentialing decisions auditable, explainable, and defensible for compliance teams
- Directed end-to-end visual identity, design system, and UI for the product's live site, translating complex agentic architecture into a clear, trustworthy interface for enterprise and non-technical stakeholders alike
- Connected Model Context Protocol (MCP) servers to keep design tooling in sync with the live product and directed rapid prototyping (Lovable, Figma Make) to validate concepts in hours, not weeks

Founder Dec 2016 – Jan 2026

Hiring Hall | Bronxville, NY

- Led the 0-to-1 strategy, design, and launch of a mobile hiring platform for the commercial construction industry, defining the business case, product vision, AI matching experience, UX/UI, and go-to-market strategy
- Secured investor funding by building a validated business case from user research, competitive analysis, and stakeholder interviews that surfaced unmet workflow needs
- Directed a cross-functional remote team of 11 (product, engineering, marketing, QA, sales), delivering end-to-end product experience on time and within budget
- Applied design thinking frameworks, including design sprints, UX research, personas, journey maps, and rapid prototyping, to compress the validation cycle and reduce engineering rework

Director, Product Design Jul 2020 – Aug 2024

Kargo | New York, NY

- Led UX strategy for internal adtech platforms, including campaign management, ad creation, CMS, and video, used by 150 global team members, aligning design roadmap with revenue and operational goals
- Scaled team from 0 to 6 designers; established data-driven design practices, OKRs, and a culture of continuous research that reduced rework and improved delivery velocity
- Built and scaled a Material UI design system that reduced design-to-development handoff time by 20% and improved consistency across four product lines
- Institutionalized monthly user research programs, including usability studies, A/B tests, and heuristic evaluations, translating user insights into roadmap priorities and executive decision-making

Lead Product Designer Dec 2017 – Jul 2020

TripleLift | New York, NY

- Led UX/UI transformation of a multi-product B2B adtech suite spanning programmatic, video, branded content, and CTV
- Built 0-1 AI-Powered Branded Content Intelligence System (ContentDial), transforming branded content from a manual, high-touch service into a scalable, data-driven product that enabled advertisers to make smarter decisions and drive measurable performance, higher ROI, engagement, and campaign efficiency
- Increased user satisfaction 23% and improved native ad product perception by 11% within 12 months through research-driven redesign and interaction design improvements
- Drove 12% year-over-year revenue growth by aligning design initiatives directly with client monetization workflows and conversion optimization

UX Design Lead Dec 2016 – Dec 2017

Verizon | New York, NY

- Directed UX strategy across Verizon's B2C website serving 56 million monthly visitors; led redesign of the Tech Store, a multimillion-dollar revenue channel, improving revenue 11% and new customer acquisition 5%
- Contributed to Verizon's enterprise design system adopted by 300+ designers and agency partners, improving cross-brand experience consistency
- Managed multiple agencies to unify device purchasing and plan selection journeys, increasing customer satisfaction NPS 17% and engagement 12%

UX/UI Creative Director Mar 2013 – Sep 2016

Priceline | New York, NY

- Led UX/UI optimization across mobile and desktop booking experiences for one of the world's largest online travel agencies, improving conversion by 4.9% and customer satisfaction with 41 NPS
- Managed a team of 7 UX/UI designers, improving experiences and business impact across Hotels, Flights, Rental Cars, Packages, and Cruises
- Drove 3% YoY revenue increase and directed a site-wide redesign grounded in customer research and A/B testing
- Improved checkout by reducing cart abandonment 23% through research-driven conversion funnel analysis and usability testing

CORE COMPETENCIES

- Agentic AI Design
- Full-Stack Product Design
- Product & Design Strategy
- User-Centered Design & Design Thinking
- UX Research
- Revenue Growth & Conversion Optimization
- Customer Lifetime Value (CLV) Optimization
- Business Case Development
- Design Systems
- Rapid Prototyping
- Usability Testing
- A/B Testing
- Systems Thinking
- Journey Mapping
- Interaction Design
- Responsive & Mobile Design

EDUCATION

Diploma, Commercial & Fine Art

Connecticut Institute of Art

UX Certificate

Nielsen Norman Group
